Technical skills

Backend
PHP (5.5 to 8.3), Slim Framework, Java, Python, Django, Node.js, Express.js, REST APIs

Frontend
React, React Native, Vue 3, Angular, TypeScript, JavaScript, HTML, CSS/Sass

Data and cache
PostgreSQL, MySQL/MariaDB, MongoDB, SQLite, Redis

Cloud and DevOps
AWS, Docker, CI/CD, GitHub Actions, Jenkins, Linux, pfSense

Observability
Grafana, Prometheus

Integrations and messaging
Twilio (SMS/WhatsApp), System integrations

Artificial Intelligence
Analysis, Development, Review and refactoring, Documentation, Code automation

Practices
OOP, Modular architecture, Security, Performance, Scalability, Clean Code, Multi-tenancy, Row-Level Security (RLS), Data auditing

Languages

English: Technical reading; basic conversation

Education

Bachelor's in Computer Science
Unisul (University of Southern Santa Catarina), online · in progress, expected completion Jul/2028

Additional knowledge

Laravel
Freelance/personal projects

Spring Boot
Self-study

Summary

Senior Full Stack Developer and Tech Lead with over 20 years of exposure to technology: programming since 2003 and, since 2016, fully dedicated to a software development career. Experience in development, technical leadership, support and infrastructure. In recent years, I have worked at private technology companies (GovTech) hired through public bidding by city governments, building health systems (used by municipal hospitals and emergency care units) and education systems (used by the municipal school network). Experience in web applications, integrations, dashboards and management systems, with PHP (from legacy 5.5 to modern 8.3), JavaScript/TypeScript, React, Vue, Angular, Java, Node.js, PostgreSQL, MySQL/MariaDB, MongoDB, Redis, AWS, Docker and CI/CD. Delivered retail management systems end to end, on my own. I use Artificial Intelligence in software development to support analysis, implementation, code review and refactoring, troubleshooting, documentation and automation, always keeping technical validation and accountability.

Professional experience

Full Stack Developer | **Dec/2025 – present**
Evva Tecnologia · GovTech · São Paulo area

- Private technology company hired by a city government through public bidding; working on the education system used by the municipal school network.
- Development of web applications, management dashboards, REST APIs and integrations with internal systems and external services, including Redis (cache) and AWS (cloud infrastructure), and messaging integrations via Twilio (SMS/WhatsApp); database modeling and optimization.
- Implementation of automations and responsive interfaces focused on performance, security, scalability and code quality; use of AI to support analysis, review and documentation.

Project Lead Developer | Full Stack | **Oct/2021 – Nov/2025 (4y 2m)**
Troupe Tecnologia · GovTech · São Paulo area

- Over four years at a private technology company hired by city governments through public bidding, working on two systems: health (used by municipal hospitals and emergency care units) and education (used by the municipal school network).
- Development and maintenance of web applications, management systems, dashboards, REST APIs and system integrations, with database modeling and optimization.
- Technical leadership across the full solution lifecycle, applying security, performance, scalability and code quality practices.

IT Technician | **Apr/2018 – Apr/2020 (2y 1m)**
Apoio Informática · Paulínia, SP

- Administration of Linux servers, databases and virtualization environments (XenServer, Proxmox VE).
- pfSense firewall deployment, user support and corporate infrastructure maintenance.

IT Intern | **Jun/2017 – Apr/2018 (11m)**
Unicamp · Campinas area

- Technical support for staff and maintenance of systems and equipment in a hospital environment.

Intern | **Sep/2016 – May/2017 (9m)**
Be Create · Campinas area

- Website development in WordPress/PHP, multimedia editing and copywriting for digital marketing campaigns.

Selected projects

Freelance developer since 2003. Confidential projects (NDA); representative selection.

Express Delivery Platform | **2020**
Delivery platform that rewards couriers, built solo (requirements, PO, QA, Full Stack): three service levels, real-time tracking with Google Maps and delivery batching for route optimization. *PHP, Slim, Vue.js, Google Maps API.*

Time Tracking System | **2020**
Work-hours tracking with employee and manager areas, web and mobile, built solo end to end. *Python, Django, React, React Native.*

Landing Pages, Marketing Agency | **2019**
High-conversion landing pages in React.js and Vue.js for finance, hospitality and wind energy clients. *React, Vue.js.*

Veterinary Clinic System | **2017–2018**
Multi-tenant veterinary management: scheduling, records, inventory, finance and pet pick-up/delivery logistics with Google Maps; PostgreSQL with auditing and Row-Level Security (RLS). *PHP, Slim, Vue.js, PostgreSQL, RLS.*

Building Materials Store Management | **2015–2018**
Management system for a building materials store, built from scratch and maintained for 3 years: quotes and orders, multiple units of measure, stock (lots, committed), deliveries and in-house credit. *Angular, Java, MySQL.*

Clothing Store Management | **2010–2015**
Clothing store management (freelance, support 2010 to 2015): color x size grid, POS with commissions, on-approval control, exchanges with store credit, cashback and turnover-based purchasing. *Angular, PHP, PostgreSQL.*

Help Desk Ticketing System | **2006–2010**
Help desk ticketing system built for the IT company where I worked in support: routing, priorities and SLA, history, notifications and service dashboards. *CakePHP, PHP, MySQL.*

Business domain

GovTech: health systems (municipal hospitals and emergency care units) and education systems (municipal school network) hired by city governments through public bidding; management systems (ERP/CRM), management dashboards and indicators. Retail (building materials and fashion), logistics and delivery (real-time tracking, route optimization), time tracking/HR, animal health (multi-tenant veterinary systems), help desk, e-commerce and marketplaces, payment gateways, administrative process automation.
